OFFICE MEMORANDUM**NO.IT&C/5-29/07(Pt-I)/547 ::****Dated Kohima, the 27th June 2022.****National Broadband Mission for All by 2022.**

The National Broadband Mission (NBM) which envisages Broadband for All by 2022 and the Next Generation Mobile Technologies including 5G is an important medium to deliver broadband services.

2. To achieve the goals of NBM, and to roll out 5G services, the Telecom Service Providers (TSPs) and Infrastructure Providers (IPs) have to lay optical Fibre Cables (OFC) and erect/use Towers/Poles in the nook and corner of the country. The roll out of 5G services, scheduled in the later part of this year, requires a large densification of mobile network. This requires street furniture for deploying 5G small cells, to be installed close to every 200 meters. To enable such a mega rollout, the Government of India suggests utilization of Government infrastructure such as government office/ properties/ buildings, bus terminals, electric poles, traffic junctions, school buildings etc. for the rollout of mobile towers/ poles with minimal charges.

3. It may be appreciated that licensing out these government assets on market price or on the 'principle of maximization of revenue' defeats the very purpose of achieving "Broadband for All" and also makes broadband unaffordable to common citizens, more so considering the large capex investments required to rollout mobile infrastructure.

4. Whereas, the support and corporation of all the stakeholder Departments in the state is required to draft a policy for utilization of Government infrastructure and street furniture at nominal rent in the state, for rolling out telecom infrastructure through appropriate Right of Way policy formulation and its alignment with Central Right of Way Rules 2016 and State ROW Rules 2019.

Therefore, the State Level Officers needs to co-ordinate with all stakeholder Departments, local Body authorities, Discoms and TSPs to constitute a task force for evolving a workable solution for rolling out 5G small cells using street furniture for digitalization and building smart infrastructure in the state.
